Candidates must write the Code on the title page of the answer-book.

- कृपया जाँच कर लें कि इस प्रश्न-पत्र में मुद्रित पृष्ठ 16 हैं।
- प्रश्न-पत्र में दाहिने हाथ की ओर दिए गए कोड नम्बर को छात्र उत्तर-पुस्तिका के मुख-पृष्ठ पर लिखें।
- कृपया जाँच कर लें कि इस प्रश्न-पत्र में 36 प्रश्न हैं।
- कृपया प्रश्न का उत्तर लिखना शुरू करने से पहले, प्रश्न का क्रमांक अवश्य लिखें।
- इस प्रश्न-पत्र को पढ़ने के लिए 15 मिनट का समय दिया गया है। प्रश्न-पत्र का वितरण पूर्वाहंग में 10.15 बजे किया जाएगा। 10.15 बजे से 10.30 बजे तक छात्र केवल प्रश्न-पत्र को पढ़ेंगे और इस अवधि के दौरान वे उत्तर-पुस्तिका पर कोई उत्तर नहीं लिखेंगे।
- Please check that this question paper contains 16 printed pages.
- Code number given on the right hand side of the question paper should be written on the title page of the answer-book by the candidate.
- Please check that this question paper contains 36 questions.
- Please write down the Serial Number of the question before attempting it.
- 15 minute time has been allotted to read this question paper. The question paper will be distributed at 10.15 a.m. From 10.15 a.m. to 10.30 a.m., the students will read the question paper only and will not write any answer on the answer-book during this period.

संकलित परीक्षा – II
SUMMATIVE ASSESSMENT – II
विज्ञान
SCIENCE

निर्धारित समय : 3 घण्टे  
Time allowed : 3 hours

अधिकतम अंक : 90  
Maximum Marks : 90
General Instructions:

(i) The question paper comprises two Sections, A and B. You are to attempt both the sections.

(ii) All questions are compulsory.

(iii) There is no choice in any of the questions.

(iv) All questions of Section A and all questions of Section B are to be attempted separately.

(v) Question numbers 1 to 3 in Section A are one-mark questions. These are to be answered in one word or in one sentence.

(vi) Question numbers 4 to 6 in Section A are two-marks questions. These are to be answered in about 30 words each.

(vii) Question numbers 7 to 18 in Section A are three-marks questions. These are to be answered in about 50 words each.
(viii) **Question numbers 19 to 24 in Section A are five-marks questions. These are to be answered in about 70 words each.**

(ix) **Question numbers 25 to 33 in Section B are multiple choice questions based on practical skills. Each question is a one-mark question. You are to select one most appropriate response out of the four provided to you.**

(x) **Question numbers 34 to 36 in Section B are two-marks questions based on practical skills. These are to be answered in brief.**

### भाग अ

#### SECTION A

1. **व्यूटेन, C₄H₁₀ के अणु में सहसंग्रोजी आबन्धों की संख्या लिखिए।**
   
   Write the number of covalent bonds in the molecule of butane, C₄H₁₀.  

2. **पुनरुद्धरता (पुनर्जनन) की क्षमता वाले दो सामान्य जीवों के नाम लिखिए।**
   
   Name two simple organisms having the ability of regeneration.  

3. **निम्नलिखित में से कौन सदैव आहार श्रृंखलाओं के द्वितीय पोषी स्तर पर होते हैं?**
   
   मांसाहारी, स्वपोषी, शाकाहारी  

   Which of the following are always at the second trophic level of food chains?  
   
   Carnivores, Autotrophs, Herbivores  

4. **किसी उत्तल दर्पण के मुख्य अंक के समान्तर आपतित प्रकाश किरण के संगत परावर्तित किरण का पथ दर्शाने के लिए किरण आपेक्ष खींचकर इस आपेक्ष पर आपतन कोण और परावर्तन कोण दर्शाएं।**
   
   Draw a ray diagram to show the path of the reflected ray corresponding to an incident ray of light parallel to the principal axis of a convex mirror and show the angle of incidence and angle of reflection on it.  

5. **प्राकृतिक संसाधनों का संप्रोक्तिप्रबन्धन क्यों आवश्यक है? पुनः उपयोग और पुनः चक्रण, दोनों में से अप किसी व्यवहार में लाना बेहतर समझते हैं? कारण दीजिए।**
   
   Why is sustainable management of natural resources necessary? Out of the two – reuse and recycle – which, in your opinion, is better to practise? Give reason.  

6. **जैव विविधता से क्या तात्पर्य है? वनों एवं वन्य-जीव संरक्षण के दो लाभों की सूची बनाएं।**
   
   What is meant by biodiversity? List two advantages of conserving forests and wild life.
7. Write the name and general formula of a chain of hydrocarbons in which an addition reaction with hydrogen is possible. State the essential condition for an addition reaction. Stating this condition, write a chemical equation giving the name of the reactant and the product of the reaction.

8. List two tests for experimentally distinguishing between an alcohol and a carboxylic acid and describe how these tests are performed.

9. Given below are some elements of the modern periodic table. Atomic number of the element is given in the parentheses:
   
   A(4), B(9), C(14), D(19), E(20)
   
   (a) Select the element that has one electron in the outermost shell. Also write the electronic configuration of this element.
   
   (b) Which two elements amongst these belong to the same group? Give reason for your answer.
   
   (c) Which two elements amongst these belong to the same period? Which one of the two has bigger atomic radius?
10. Taking the example of an element of atomic number 16, explain how the electronic configuration of the atom of an element relates to its position in the modern periodic table and how valency of an element is calculated on the basis of its atomic number.

11. Identify A, B and C in the given diagram and write one function of each.
12. List four categories of contraceptive methods. State in brief two advantages of adopting such preventive methods.

13. What are chromosomes? Explain how in sexually reproducing organisms the number of chromosomes in the progeny is maintained.

14. Explain the following:
   (a) Speciation
   (b) Natural Selection

15. Explain with an example for each, how the following provides evidences in favour of evolution in organisms:
   (a) Homologous organs
   (b) Analogous organs
   (c) Fossils

16. With the help of scattering of light, explain the reason for the difference in colours of the sun as it appears during sunrise/sunset and noon.
17. An object of height 5 cm is placed perpendicular to the principal axis of a concave lens of focal length 10 cm. If the distance of the object from the optical centre of the lens is 20 cm, determine the position, nature and size of the image formed using the lens formula.

18. Differentiate between biodegradable and non-biodegradable substances with the help of one example each. List two changes in habit that people must adopt to dispose non-biodegradable waste, for saving the environment.

19. An object of height 5 cm is placed perpendicular to the principal axis of a concave lens of focal length 10 cm. If the distance of the object from the optical centre of the lens is 20 cm, determine the position, nature and size of the image formed using the lens formula.
Write the importance of ciliary muscles in the human eye. Name the defect of vision that arises due to gradual weakening of the ciliary muscles in old age. What type of lenses are required by the persons suffering from this defect to see the objects clearly?

Akshay, sitting in the last row in his class, could not see clearly the words written on the blackboard. When the teacher noticed it, he announced if any student sitting in the front row could volunteer to exchange his seat with Akshay. Salman immediately agreed to exchange his seat with Akshay. He could now see the words written on the blackboard clearly. The teacher thought it fit to send the message to Akshay’s parents advising them to get his eyesight checked.

In the context of the above event, answer the following questions:

(a) Which defect of vision is Akshay suffering from? Which type of lens is used to correct this defect?

(b) State the values displayed by the teacher and Salman.

(c) In your opinion, in what way can Akshay express his gratitude towards the teacher and Salman?

20. किसी लेंस की क्षमता से क्या तत्परत्व है? इसके S.I. मात्रक की परिभाषा लिखिए।

आपके पास दो लेंस A और B हैं जिनकी फोकस दूरीयाँ क्रमशः +10 cm और −10 cm हैं। इन दोनों लेंसों की प्रकृति लिखिए और क्षमता ज्ञात कीजिए। इन दोनों में से किस लेंस से किसी बिंदु को लेंस से 8 cm दूरी पर रखने पर उसका आभासी और आवर्धित प्रतिबिंब बनेगा? अपने उत्तर की पुस्तिके के लिए एक किरण आरेख खींचिए।

What is meant by power of a lens? Define its S.I. unit.

You have two lenses A and B of focal lengths +10 cm and −10 cm respectively. State the nature and power of each lens. Which of the two lenses will form a virtual and magnified image of an object placed 8 cm from the lens? Draw a ray diagram to justify your answer.

21. 10 cm फोकस दूरी के किसी उत्तल लेंस के आधे भाग को काले कागज से ढक दिया गया है। क्या यह लेंस 30 cm दूरी पर स्थित बिंदु का पूरा प्रतिबिंब बना सकता है? अपने उत्तर की पुस्तिके के लिए एक किरण आरेख खींचिए।

कोई 4 cm लम्ब बिंदु 20 cm फोकस दूरी के किसी उत्तल लेंस के मुख्य अक्ष के लम्बवत् रखा है। बिंदु की लेंस से दूरी 15 cm है। प्रतिबिंब की प्रकृति, स्थिति और साइज़ ज्ञात कीजिए।

www.CentumSure.com
One half of a convex lens of focal length 10 cm is covered with a black paper. Can such a lens produce an image of a complete object placed at a distance of 30 cm from the lens? Draw a ray diagram to justify your answer.

A 4 cm tall object is placed perpendicular to the principal axis of a convex lens of focal length 20 cm. The distance of the object from the lens is 15 cm. Find the nature, position and size of the image.

22. How do Mendel’s experiments show that the
(a) traits may be dominant or recessive,
(b) traits are inherited independently?

23. (a) Name the human male reproductive organ that produces sperms and also secretes a hormone. Write the functions of the secreted hormone.
(b) Name the parts of the human female reproductive system where
(i) fertilisation takes place,
(ii) implantation of the fertilised egg occurs.

Explain how the embryo gets nourishment inside the mother’s body.

24. Both soap and detergent are some type of salts. What is the difference between them? Describe in brief the cleansing action of soap. Why do soaps not form lather in hard water? List two problems that arise due to the use of detergents instead of soaps.
25. A student traces the path of a ray of light through a rectangular glass slab for different values of angle of incidence. He observes all possible precautions at each step of the experiment. At the end of the experiment, on analysing the measurements, which of the following conclusions is he likely to draw?

(A) $\angle i = \angle e < \angle r$
(B) $\angle i < \angle e < \angle r$
(C) $\angle i > \angle e > \angle r$
(D) $\angle i = \angle e > \angle r$
A student obtains a sharp image of the distant window (W) of the school laboratory on the screen (S) using the given concave mirror (M) to determine its focal length. Which of the following distances should he measure to get the focal length of the mirror?

(A) MW
(B) MS
(C) SW
(D) MW – MS
A student used a device (X) to obtain/focus the image of a well illuminated distant building on a screen (S) as shown below in the diagram. Select the correct statement about the device (X).

(A) This device is a concave lens of focal length 8 cm.
(B) This device is a convex mirror of focal length 8 cm.
(C) This device is a convex lens of focal length 4 cm.
(D) This device is a convex lens of focal length 8 cm.
29. Given below is the list of vegetables available in the market. Select from these the two vegetables having homologous structures:

Potato, sweet potato, ginger, radish, tomato, carrot, okra (Lady’s finger)

(A) Potato and sweet potato
(B) Radish and carrot
(C) Okra and sweet potato
(D) Potato and tomato

30. Given below is the list of vegetables available in the market. Select from these the two vegetables having homologous structures:

Potato, sweet potato, ginger, radish, tomato, carrot, okra (Lady’s finger)

(A) Potato and sweet potato
(B) Radish and carrot
(C) Okra and sweet potato
(D) Potato and tomato
A student was asked to observe and identify the various parts of an embryo of a red kidney bean seed. He identified the parts and listed them as under:

I. Tegmen
II. Testa
III. Cotyledon
IV. Radicle
V. Plumule

The correctly identified parts among these are

(A) I, II and III
(B) II, III and IV
(C) III, IV and V
(D) I, III, IV and V

31. साबुन बनाने समय प्रायः वनस्पति तेल और सोडियम हाइड्रॉक्साइड के अभिक्रिया मिश्रण में थोड़ी मात्रा में साधारण नमक मिलाया जाता है। साधारण नमक मिलाने का निम्नलिखित में से क्या उद्देश्य हो सकता है?

(A) साबुन की क्षरीय प्रकृति को घटाना
(B) साबुन को उदासीन बनाना
(C) साबुन की सफाई की क्षमता को बढ़ाना
(D) साबुन के अवक्षेपण में सहायता करना

While preparing soap a small quantity of common salt is generally added to the reaction mixture of vegetable oil and sodium hydroxide. Which one of the following may be the purpose of adding common salt?

(A) To reduce the basic nature of the soap
(B) To make the soap neutral
(C) To enhance the cleansing power of the soap
(D) To favour the precipitation of the soap
32. A student takes about 4 mL of distilled water in four test tubes marked P, Q, R and S. He then dissolves in each test tube an equal amount of one salt in one test tube, namely sodium sulphate in P, potassium sulphate in Q, calcium sulphate in R and magnesium sulphate in S. After that he adds an equal amount of soap solution in each test tube. On shaking each of these test tubes well, he observes a good amount of lather (foam) in the test tubes marked

(A) P and Q  
(B) Q and R  
(C) P, Q and S  
(D) P, R and S

33. What do we observe on pouring acetic acid on red and blue litmus papers?

(A) Red litmus remains red and blue litmus turns red.  
(B) Red litmus turns blue and blue litmus remains blue.  
(C) Red litmus turns blue and blue litmus turns red.  
(D) Red litmus becomes colourless and blue litmus remains blue.
34. Students were asked to observe the permanent slides showing different stages of budding in yeast under high power of a microscope.

(a) Which adjustment screw (coarse/fine) were you asked to move to focus the slides?

(b) Draw three diagrams in correct sequence showing budding in yeast.

35. When you add sodium hydrogen carbonate to acetic acid in a test tube, a gas liberates immediately with a brisk effervescence. Name this gas. Describe the method of testing this gas.

36. A 4 cm tall object is placed on the principal axis of a convex lens. The distance of the object from the optical centre of the lens is 12 cm and its sharp image is formed at a distance of 24 cm from it on a screen on the other side of the lens. If the object is now moved a little away from the lens, in which way (towards the lens or away from the lens) will he have to move the screen to get a sharp image of the object on it again? How will the magnification of the image be affected?
